Funica: Screen Build Order (Start Se End Tak)

Is doc mein exact order hai ki kaunsi file pehle banani hai aur kaunsi baad mein. Upar se neeche ek ek step karte jao. Har step ke baad `flutter run` karke dekho aur `git commit` kar do.

Paths `lib/` ke andar ke hain. `<f>` ka matlab `features`.

Order Kyun Aisa Hai?

- Pehle wo cheezein jo har screen use karti hai (colors, button, text field), warna baar baar copy-paste karna padega.
- Phir user ke journey ke hisaab se screens: app khule, login ho, home dikhe, product dekhe, cart, checkout, orders, profile.
- Backend (Firebase) sabse last mein, jab UI dummy data se poora ho jaye.

Stage 0: Pehle Ye Check Karo

- [ ] `flutter doctor` clean hai
- [ ] `create_funica_mvvm.ps1` chal chuki hai
- [ ] `code .` se project VS Code mein khula hai
- [ ] `flutter run` se khaali app emulator mein chal rahi hai

Stage 1: Foundation (Screens Se Pehle)

Is stage mein koi screen nahi banti, sirf building blocks.

Step	File	Kya Banana Hai
1	`core/theme/app_colors.dart`	Image dekh ke colors final karo (background, surface, card, text).
2	`core/theme/app_theme.dart`	Font (Urbanist), button style, input style, dark theme.
3	`shared/widgets/primary_button.dart`	White pill button, loading state ke saath, onPressed aur text lega.

Step	File	Kya Banana Hai
4	`shared/widgets/app_text_field.dart`	Rounded dark input field, icon, password show/hide.
5	`shared/models/product.dart`	Product class: id, name, price, image, rating, category.
6	`core/constants/app_assets.dart`	Image paths ke constants. Product images `assets/images/` mein daalo aur `pubspec.yaml` mein register karo.
7	`shared/widgets/product_card.dart`	Image, naam, rating, price, heart icon wala card.
8	`shared/widgets/category_chip.dart`	Filter chip (All, Sofa, Chair...), selected aur unselected style.
9	`shared/widgets/success_dialog.dart`	Congratulations modal: icon, title, message, spinner/button.
10	`core/router/app_router.dart`	go_router setup, saare route names ek jagah. Shuru mein 2-3 routes, baaki screens banate waqt add karte jao.
11	`main.dart`	`MaterialApp` ko `MaterialApp.router` mein badlo.

Done check: ek test screen pe button, text field, product card dikh rahe hain.

Stage 2: Onboarding

Step	File	Kya Banana Hai
12	`<f>/onboarding/views/splash_screen.dart`	Logo center mein, 2 second baad agle screen pe jao.
13	`<f>/onboarding/views/onboarding_screen.dart`	3 slides ka PageView, dots indicator, Next/Skip button.

Stage 3: Authentication Screens

Pehle sirf UI banao, button dabane pe agli screen pe navigate karo. Firebase baad mein.

Step	File	Kya Banana Hai
14	`<f>/auth/views/lets_you_in_screen.dart`	Social login buttons (Facebook, Google, Apple), Sign in with password.
15	`<f>/auth/views/signup_screen.dart`	Logo, email, password, remember me, Sign up button.
16	`<f>/auth/views/login_screen.dart`	Signup jaisa hi layout, Forgot password link. Signup se copy karke badlo.
17	`<f>/auth/views/fill_profile_screen.dart`	Avatar, naam, nickname, DOB, email, phone, gender, Continue.
18	`<f>/auth/views/create_pin_screen.dart`	4 box PIN input (`pinput` package) aur number keypad.
19	`<f>/auth/views/fingerprint_screen.dart`	Fingerprint icon, Skip aur Continue buttons.
20	`<f>/auth/views/forgot_password_screen.dart`	SMS ya Email ka option select karo, Continue.
21	`<f>/auth/views/otp_screen.dart`	4 digit code, resend timer, Verify button.
22	`<f>/auth/views/create_new_password_screen.dart`	Do password fields, Continue, success dialog (Step 9 wala).

Done check: Splash se leke Create New Password tak poora flow tap karke ghoom sakte ho.

Stage 4: Home

Step	File	Kya Banana Hai
23	`<f>/home/views/main_shell_screen.dart`	Bottom nav bar (Home, Wishlist, Cart, Orders, Profile) aur tab switching. Router mein ShellRoute lagao.
24	`<f>/home/views/home_screen.dart`	Greeting row, search bar, offers banner, 8 category icons, Most Popular grid. Dummy products use karo.
25	`<f>/home/views/special_offers_screen.dart`	25%, 15%, 30%, 20% wale offer cards ki list.
26	`<f>/home/views/most_popular_screen.dart`	Chips + 2 column product grid.
27	`<f>/notifications/views/notification_screen.dart`	Today, Yesterday, Older sections ki list.

Stage 5: Products

Step	File	Kya Banana Hai
28	`<f>/product/views/category_list_screen.dart`	Ek reusable screen jo category naam leke uske products dikhaye (Sofa, Chair, Table, Kitchen, Lamp, Cupboard, Vase). Home ke category icons se jodo.
29	`<f>/product/views/product_detail_screen.dart`	Image carousel, naam, rating, description, color swatches, quantity stepper, Add to Cart.
30	`<f>/product/views/reviews_screen.dart`	Rating chips (All, 5, 4, 3...) aur review list.

Stage 6: Search, Filter, Wishlist

Step	File	Kya Banana Hai
31	`<f>/search/views/search_screen.dart`	Search box, recent searches list, results grid.
32	`<f>/search/views/search_empty_screen.dart`	Result na mile to illustration aur message.
33	`<f>/search/views/sort_filter_sheet.dart`	Bottom sheet: category chips, price range slider, rating, sort, Reset/Apply.
34	`<f>/wishlist/views/wishlist_screen.dart`	Category chips aur product grid, heart se remove.

Stage 7: Cart Aur Checkout

Step	File	Kya Banana Hai
35	`<f>/cart/views/cart_screen.dart`	Item rows, quantity +/-, total, Checkout button.
36	`<f>/cart/views/remove_from_cart_sheet.dart`	Confirm sheet: Cancel / Yes, Remove.
37	`<f>/checkout/views/checkout_screen.dart`	Address, order list, shipping, promo, summary, Continue to Payment.
38	`<f>/checkout/views/shipping_address_screen.dart`	Address list with radio select.
39	`<f>/checkout/views/choose_shipping_screen.dart`	Economy, Regular, Cargo, Express options.
40	`<f>/checkout/views/add_promo_screen.dart`	Promo list aur Apply.
41	`<f>/checkout/views/payment_methods_screen.dart`	Wallet, PayPal, Google Pay, Apple Pay, card list.

Step	File	Kya Banana Hai
42	`<f>/checkout/views/enter_pin_screen.dart`	Create PIN screen (Step 18) ka widget reuse karo.
43	`<f>/checkout/views/order_success_sheet.dart`	Success dialog (Step 9) reuse karo, View Order aur E-Receipt buttons.

Done check: Product detail se Add to Cart, Cart, Checkout, Payment, PIN, Success tak poora flow chalta hai.

Stage 8: Orders

Step	File	Kya Banana Hai
44	`<f>/orders/views/my_orders_screen.dart`	Active aur Completed tabs, empty state, Track Order / Leave Review buttons.
45	`<f>/orders/views/track_order_screen.dart`	Product card aur status timeline.
46	`<f>/orders/views/leave_review_sheet.dart`	Star rating (`flutter_rating_bar`), comment box, Submit.

Stage 9: Wallet

Step	File	Kya Banana Hai
47	`<f>/wallet/views/my_wallet_screen.dart`	Balance card, Top Up button, recent transactions.
48	`<f>/wallet/views/top_up_screen.dart`	Amount, quick amount chips, keypad.
49	`<f>/wallet/views/transaction_history_screen.dart`	Full transactions list.

Step	File	Kya Banana Hai
50	`<f>/wallet/views/e_receipt_screen.dart`	Barcode, product, amount, tax, payment details.

Stage 10: Profile Aur Settings

Step	File	Kya Banana Hai
51	`<f>/profile/views/profile_screen.dart`	Photo, naam, menu list (arrow wali rows), Dark Mode toggle, Logout.
52	`<f>/profile/views/edit_profile_screen.dart`	Fill Profile (Step 17) jaisa form, prefilled.
53	`<f>/profile/views/address_list_screen.dart`	Saved addresses, edit icon, Add New Address.
54	`<f>/profile/views/add_address_screen.dart`	Map placeholder, address fields, Add button.
55	`<f>/profile/views/notification_settings_screen.dart`	Toggle switches ki list.
56	`<f>/profile/views/payment_settings_screen.dart`	Linked accounts list, Add New Card.
57	`<f>/profile/views/add_card_screen.dart`	Card preview, card holder, number, expiry, CVV.
58	`<f>/profile/views/security_screen.dart`	Toggles, Change PIN, Change Password.
59	`<f>/profile/views/language_screen.dart`	Suggested aur baaki languages, radio select.
60	`<f>/profile/views/privacy_policy_screen.dart`	Scrollable text.
61	`<f>/profile/views/invite_friends_screen.dart`	Contacts list, Invite / Invited button.

Stage 11: Help Center

Step	File	Kya Banana Hai
62	`<f>/help/views/help_center_screen.dart`	FAQ aur Contact Us tabs, expandable questions, contact options.
63	`<f>/help/views/customer_service_chat_screen.dart`	Chat bubbles, message input, send button.

Stage 12: UI Polish

- [ ] Har list screen pe loading (shimmer) aur empty state
- [ ] Keyboard khulne pe layout overflow na ho
- [ ] Alag screen sizes pe check karo
- [ ] Sab jagah colors `AppColors` se hain, hardcode nahi

Stage 13: Ab Backend (Firebase) Jodo

UI poora hone ke baad hi. Har feature mein sirf Repository aur ViewModel badalta hai, screens waise hi rehti hain.

Step	Kya Karna Hai
64	Firebase project banao, `flutterfire configure`, packages add, `main.dart` mein `Firebase.initializeApp()`.
65	Auth: `auth_repository.dart` aur `auth_viewmodel.dart` (login, signup, Google, OTP, reset).
66	Products: Firestore mein data daalo, `product_repository.dart` se home aur category screens jodo.
67	Wishlist aur Cart ko Firestore se jodo.
68	Addresses, Checkout aur Orders create karna.

Step	Kya Karna Hai
69	Wallet aur Transactions (balance update Cloud Function se).
70	Profile data, photo upload (Storage), settings.
71	Reviews, Help chat, FAQs.
72	Push notifications (FCM).
73	Firestore aur Storage security rules lagao.

Stage 14: Test Aur Release

- [ ] Real phone pe poora flow test
- [ ] ViewModels ke unit tests
- [ ] App icon aur splash set karo
- [ ] `flutter build appbundle --release`
- [ ] Play Store pe upload

Har Step Ka Rule

1. Screen ka ek hi kaam sochkar banao, pehle dummy data se.
2. Image se layout aur colors match karo.
3. `flutter run` karke dekho.
4. `git commit -m "Add <screen name>"`.
5. Agla step.

Agar Atak Jao

- Jo screen pehle bana chuke ho uske jaisi nayi screen ho (Login/Signup, Fill Profile/Edit Profile, Create PIN/Enter PIN) to copy karke badlo.
- Jo widget do jagah repeat ho, use `shared/widgets/` mein le jao.
- Error aaye to pura error text copy karke bhejo, screenshot nahi.
